Re: Inquiring for a position of a Backend development intern.

Dear Sir/Madam,

I am a student at AkiraChix currently pursuing a diploma in Information Technology. I am inquiring about a position as an entry-level backend developer internship in your company. I am fascinated with how you Leverage the Human-Centered Design Process to come up with your end solutions, which is something I am really interested in.
,

I have created a bank system that allows the users to deposit, withdraw and transfer money with object-oriented programming skills in Python. Through collaboration with a team of six members, we worked on a project for a coffee shop that enables customers to place an order and make payments. This has sharpened my interpersonal skills, time management, and problem-solving.

Thank you for your time and consideration. Hoping to hear from you soon.

Sincerely,

Sarah Matishoi.
